Summer Institute in Public Health Genetics: “Translating Genomics into Policy and Practice”

This 5-day dual-track institute will provide an introduction to public health genomics. It is geared towards professionals interested in obtaining knowledge and skills for integrating genomics principles and applications into health practice and policy using a population health approach. It will be held in tandem with the UW Summer Institute in Statistical Genetics on the UW campus.

Topics:

**Public Health Genomics 101
Translation to Practice**

**Genomics Health Literacy: Getting it and passing it on
Personalized Medicine**

**Genetic Epidemiology
Translation from a Global Perspective
Biobanks**

As details and registration information become available they will be posted at:
