Subject: 059 - Nanotechnology Comments on Exposure Control Procedures

Comments:
Exposure Control:

We at Nanotechnology Victoria Ltd., have designed a set of labels that draws the attention of users to the hazardous nature of nanomaterials, in particular the respiratory hazard. The labels have been designed with a view that they would ALERT those handling nanomaterials and make them think about the safety measures to be taken.

We have a pdf document describing the labels and wish to put them on NIOSH website.

If interested, Please do send me a mail at ravi.krishnamurthy@nanovic.com.au.

Yours sincerely

Dr. Ravi Krishnamurthy
