Subject: Public Comments for Docket #072 from Web site: Patient Handling

I just reviewed the safe patient training presentation. I really like the program but I do not work with nursing homes, I work with construction / manufacturing clients to provide safety consulting services. The types of lifts in these environments are much more diverse and difficult to control. Do you have a similar training presentations for general industry or construction for safe lifting? If so, where can I view them?

Thanks, Jody Wilburn -
