

Capacity Building Assistance Provider Network: Strengthening the Nation's HIV Prevention Workforce

In order to provide more personalized support and facilitate long-term working relationships at the local level, the CPN offers tailored technical assistance (TA) to meet capacity building needs within four geographic regions: Northeast, South, Midwest, and West. Regional TA services may include mentoring, consultation, demonstration, skills building, information, resource development and sharing, and opportunities for reciprocal learning among peers to increase the HIV prevention knowledge, skills, and competencies of the nation's interdisciplinary HIV prevention workforce. The primary focus of regional TA is to address programmatic challenges to effectively plan, integrate, implement, and sustain HIV prevention programs and services within a jurisdiction.

A group of twelve regional TA providers offers support to CDC-funded health departments, community-based organizations (CBOs), and their partnering organizations.

	Funded Organizations			
	Northeast	South	Midwest	West
Track A: Clinical HIV Testing and Prevention for Persons with HIV	Primary Care Development Corporation	My Brother's Keeper	San Francisco Community Health Center (formerly Asian and Pacific Islander Wellness Center)	Denver Health and Hospital Authority (Denver Prevention Training Center)
Track B: Nonclinical HIV Testing and Prevention for HIV Negative Persons	University of Rochester	Latino Commission on AIDS	Washington University	City & County of San Francisco Department of Public Health
Track C: Integrated HIV Activities and Structural Interventions	New York City Department of Health & Mental Hygiene	National Alliance of State & Territorial AIDS Directors	AIDS United	Public Health Foundation Enterprises, Inc. (California Prevention Training Center)

All CDC directly funded health departments, CBOs, and/or clinics may request technical assistance on planning, integrating, implementing, and sustaining their HIV prevention programs and services by using the CBA Tracking System (CTS) here: <https://tinyurl.com/regionalTA>

Organizations not directly funded by CDC should contact their state health department for assistance in submitting a request for TA.
