1 Rank based on number of deaths

^{*} Figure does not meet standards of reliability or precision

[Rates per 100,000 population in specified group. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. The title for Essential hypertension and hypertensive renal disease was changed in 2006 to reflect the addition of Secondary hypertension (ICD code I15); see the "Technical Notes" of *Deaths: Final Data for 2006*]

1 Rank based on number of deaths

^{*} Figure does not meet standards of reliability or precision

[Rates per 100,000 population in specified group. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. The title for Essential hypertension and hypertensive renal disease was changed in 2006 to reflect the addition of Secondary hypertension (ICD code I15); see the "Technical Notes" of *Deaths: Final Data for 2006*]

1 Rank based on number of deaths

^{*} Figure does not meet standards of reliability or precision

[Rates per 100,000 population in specified group. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys. The title for Essential hypertension and hypertensive renal disease was changed in 2006 to reflect the addition of Secondary hypertension (ICD code I15); see the "Technical Notes" of *Deaths: Final Data for 2006*]
