

# STD Prevention Science Series

Presented by the Centers for Disease Control and Prevention's Division of STD Prevention and  
The American Sexually Transmitted Diseases Association

The **Centers for Disease Control and Prevention's Division of STD Prevention** and the **American Sexually Transmitted Diseases Association** have partnered to bring you the latest research and best practices for STD prevention with the STD Prevention Science Series. This quarterly series will bring lectures on cutting edge issues by scientists and program experts of world renown to all persons interested in the prevention of STDs, including HIV.

**JUNE 4, 2015: 1:00PM – 2:00PM**

## **Public Health in a Hostile Environment: Racial Inequality and STD/HIV in the US**

by **Adaora Adimora, MD, MPH**

It's now well understood that social factors are a major determinant of HIV and other STDs. But how can we develop relevant interventions? And what are the methodological challenges of social determinants research? This talk will explore how these issues can impact STD epidemiologic research among African Americans.

Adaora Adimora, MD, MPH. Ada Adimora is Professor of Medicine and Epidemiology at the University of North Carolina at Chapel Hill. She studies the epidemiology of HIV and STIs. Her work has helped characterize the epidemiology of heterosexual HIV transmission among African Americans, highlighted the role of sexual network patterns in the spread of HIV, and underscored the importance of macroeconomic and social forces in racial disparities in the US HIV epidemic. She is PI of the UNC WIHS site, Chairs the HIV Medical Association and the NIH HIV Prevention Trials Network's Women at Risk Committee, and is a member of the NIAID Council and the Presidential Advisory Council on HIV/AIDS.

Participants can join the event by clicking [this link](#) and calling 888-469-1176. The conference number is PW3370580 and the participant passcode is 7466758.

## **UPCOMING PRESENTATION DATES**

**September 10, 2015 | December 10, 2015**
